WOMENS OF ST JOHN'S ADDENDUM TO MEETING (KITCHEN PLANS)

1. Dorothy Vershure shared with the women and men a drawing of the proposed kitchen and dishwasher room layout.
2. The following items were discussed (changes from previous meetings)
 - a. A corner cupboard would be installed at end of cupboards on SE corner of kitchen
 - b. We are working with the State on need for hand washing sink in NE corner of kitchen. They will also be consulted on plumbing.
 - c. We will be purchasing a dish cart. Plates and other dishes will be placed in the cart instead of the cupboards on the SE corner of the kitchen. It will also make the transition during remodeling easier. The cart will be parked underneath the center counter on the west end.
 - d. A microwave shelf will be installed under the center cupboard on the east side of the kitchen.
 - e. A mixer table will be purchased instead of the cabinet unit on the NW side of the kitchen.
 - f. A low temp dishwasher will be purchased instead of a high temp. The sanitizer is chlorine and should not be damaging to the dishes, silverware or plumbing. It will also cost less to operate.
 - g. The dishwashing room design was changed. A Double sink with drain board will be used instead of the dirty sink unit because of space restrictions. We may need to be innovative in connecting the dishwasher to the sink unit as well as purchase a couple custom made units in the dish cleaning line up.
 - h. Discussion about ventilation occurred. Several ideas were presented.
 - i. The plumbers and electricians did not seem to think there would be any problems.
 - j. The goal is to complete the dishwashing room before the first of the year and complete the rest of the project after the first of the year. All prices have been received except plumbing and electrical. These need to be received for the 10/22/13 Council meeting.
 - k. It is hoped that the project will not exceed \$30,000.
3. Flooring of America provided the bid for kitchen flooring. They have recommended tiling the dining room in the near future before the floor gets in worse repair. They do not recommend a glue down product but rather a floating product that snaps together. A bid was given and Fr. Kerry has a tile sample.
- 4.
